

BI constitutions

InSA –

InSA is an international, non-profit, independent association entirely run by BI students. Our goal is the improvement of the exchange experience of students from all over the world. We reach this goal through our Buddy-program as well as through a large variety of social activities organized through the semester, helping the exchange student to integrate in Norwegian student-life as well as culture

.

GSS –

GSS is the student association for all (both national and international) Master of Science students at BI Norwegian School of Management in Oslo. The association was established in 1993 and serves approximately 800–900 students as of August 2006.

The main functions are to provide a better student environment, both academically and socially, through arranging various activities like academic seminars and social events. Thereby the students will get to know each other, build friendship and have fun during their time at BI. One will also have the opportunity to widen the horizon into fields that prepare one for the practical work life.

BBA –

The BBA Group is the student organization for all Bachelor of Business Administration students at BI Norwegian School of Management in Oslo.

First of all is our function to be available for every BBA student. We are here to answer any questions you might have on a wide range of topics, from school topics ... to living in Norway ... to social activities. We are arranging various activities whereby students get the possibility to know each other better and have fun during their time at BI.

Furthermore are we an active part in representing our students in front of the BBA

administration. We are working closely together to improve the student environment academically.

Last but not least is our goal to further integrate within the other student organizations of the SBIO and to be an active part of it.

Together these three organizations represent the international students at BI. The international students can apply for all the three boards.
