

## RESOLUTION

International Students' Union in Norway

**Date:** 20 April 2008

**Reference:** RES-2008-A

On behalf of ISU National Board, we have notices that during the past years, ISU National Board and Local Branch members have been traveling mostly by air to attend different meetings; we suggest a more environmentally friendly approach.

### *Background:*

Most of student organizations in Norway are taking the approach of using land transportation when and if possible to attend national or partner meetings. ISU is behind in having similar resolutions that would support land transportation. The aim would be to put words into action regarding more environmental friendly organization.

### *Current Situation:*

Traveling is mainly depending on situation.

### *Suggested Solution:*

To first find availability of land transportation before resolving to flying to destinations within Norway.

### *ISU proposal:*

**To have a general agreement during National Assembly that would be binding for National Board and Local Branches.**
