Agreement between  
ISU (International Students' Union) and StL (Studentenes Landsforbund)

- I. ISU and StL are hereby confirming the agreement on co-operation based on mutual respect for the two organisations' independence.
- II. The aim of the co-operation is to inform each others' organisations existence and work. ISU are obliged to work actively for local branches on StLs member institutions, and StL are committed to inform all local StL unions about ISU and to encourage the unions to start local ISU branches.
- III. The co-operation shall originate in the two organisations leadership. Both organisations shall actively seek to stimulate co-operation on a local level where ISU exists.
- IV. The communication shall be open and trusty, and will be a condition for the development of the collaboration. This shall also be true for the possible further expansion of the co-operation.
- V. The frames of the co-operation are to arrange meetings between representatives from the two organisations, attend on the other organisations events and to inform of the others activity and operation. Representatives of ISU are therefor encouraged to attend StL National meetings and to request speaking rights for whole meetings or individual cases whenever deemed necessary.
- VI. The agreement will last until one of the parties decides otherwise.
